UNDERSTANDING QUALITY CHILD CARE

The research on brain development shows that positive experiences before 5 years of age make a difference in children's future success in school, in the workplace and in having a healthy life.

Research confirms that knowledgeable, nurturing, educated staff are the key to quality Child Care.

- Licensed Child Care programs are staffed by Registered Early Childhood Educators who are professionally trained in early years and child development
- Must be a registered member of the College of ECE's
- Licensed Child Care programs are licensed by Ministry of Education and regulated by the CCEYA of the Province of Ontario
- All staff working in licensed Child Care programs have completed a vulnerable sector check and are First Aid & CPR trained

Small class size supports individualized teacher attention and care; an essential ingredient to quality care:

Licensed Child Care Centers have

- one teacher for every 3 infants
- one teacher for every 5 toddlers
- one teacher for every 8 preschoolers

Open Monday through Friday all year except statutory holidays

Licensed Nursery Schools have

- one teacher for every 5 toddlers
- one teacher for every 8 preschooler
- Days per week vary according to the community needs and follows the school calendar

- Licensed Home Child Care
- The maximum number of children in Home Based Child Care is 6
- The ages of children in Licensed Home Child Care are:

No more than 3 children under 2 years of age, up to a total of 6 children under 13 years of age. This number includes the providers own children who are not yet attending publicly funded Full day Kindergarten.

**Make a Quality Child Care Choice for your Child.
The Benefits will last a Lifetime**

Child Care Centers

Child Care centers provide a full day of early learning and care, which includes a hot lunch. Some centers may offer half-day or part time program as well. Child care centers operate year round.
